

~ Park Center *for* Procedures ~

May 29, 2020

Dear Patient,

We are looking forward to seeing each and every one of you!

I'd like to update you on added safety measures to ensure your safety and ours....

- I. We now feature the REME HALO air purifying system, which kills 99.9% of all viruses on surfaces and in the air.
- II. Additional cleaning products are being utilized along with added cleaning protocols to disinfect high-touch areas. Also, deep cleanings of the entire facility are regularly done.
- III. A mask, face cloth or bandana is required for every person entering the facility. Drivers or guests of patients are asked to wait outside the building to limit excess contact exposure.
- IV. Upon entry to the facility, all patients and staff will be checked for fever or signs of illness, including pulse oximeter readings.
- V. Our facility has been redesigned to accommodate social distancing.
- VI. All patients, visitors and staff must practice social/physical distancing.

PLEASE NOTE: All patients who are having minimally-invasive surgical procedures (*such as Spinal Cord Stimulator Implants, Vertiflex/Superions, SI Fusions, etc.*) must provide a negative COVID test result. (Instructions on where to obtain the testing will be emailed to you.) **These procedures can ONLY be scheduled AFTER the results have been received.**

We look forward to caring for you in a way that is comfortable and safe, as is always our commitment. Let us know if we can answer any questions or address your concerns.

Dr. Jonathan S. Daitch

Board Certified, Interventional Pain Management
